

FCC commissioners,

Attached please find the latest blow dealt to Live Oak Preserve victims of Century Communications.

May 23, 2008

Dear Resident:

We are pleased to announce that Bright House Networks will be the new service provider to your community. Bright House Networks cable television and high-speed internet service will replace the service currently being provided by Century Communications. Bright House Networks will also take over the invoicing for the home monitoring service.

We anticipate closing with Bright House Networks on or about May 31st, and Bright House will be contacting you to notify you as to when services will start. You will be able to enjoy the full compliment of BHN products and services, including access to hundreds of digital cable channels and iCONTROL video on demand with a Digital Smartbox. Plus, you will have the option of adding a Digital Video Recorder (DVR) or High Definition DVR so you can watch your favorite programs and movies on your schedule.

You will be receiving a letter from Bright House Networks within the next few weeks with more information about their products and services.

After closing, your existing channel lineup will change. Some of the following channels may not be part of your new channel lineup depending on the community you currently reside in.

FOX SPORTS FLORIDA
NFL NETWORK
TV TELEGUIDE

Sincerely,

CENTURY COMMUNICATIONS

William McKissock

It seems Century Communications and the Faclone Group would like to make sure they profit our contract. They have sold our contract to Brighthouse

networks locking us again into another provider. I urge the commission to ban bulk billing arrangements.

Regards,
Zuriel Cabrera
Century Communication victim
